From CSV files

Prof. Dr. Nicolas Meseth

Loading data from a CSV file is simple with the **{readr}** package:

```
orders <- read_csv("data/orders.csv")

#> # A tibble: 2,874 x 68
#>      order_id name  order~1 app_id created_at          updated_at          test  curre
#>         <dbl> <chr>   <dbl>  <dbl> <dttm>              <dttm>              <lgl>   <db
# > 1    1.13e12 B1014    1014 580111 2019-05-24 12:59:16 2019-06-19 13:23:26 FALSE     9
#> 2      1.13e12 B1015    1015 580111 2019-05-24 13:09:08 2019-06-21 14:40:07 FALSE    32
#> 3      1.13e12 B1016    1016 580111 2019-05-24 13:22:41 2019-06-21 12:35:23 FALSE    30
#> ...
```
